

TVA EnergyRight Home Energy Rebate Schedule

Upgrade	Project	Amount	Unit
HVAC System	TVA Preferred Air Source Heat Pump ^{4,5}	\$1,500	per system
HVAC System	Geothermal Heat Pump ⁴	\$1,500	per system
HVAC System	Mini Split – 17 SEER2 or higher ⁴	\$800	per system
HVAC System	Heat Pump (air source or dual fuel) – 17 SEER2 or higher ⁴	\$800	per system
HVAC System	Heat Pump (air source or dual fuel) – 15 to 16.99 SEER2 ⁴	\$500	per system
HVAC System	Central Air Conditioner – 17 SEER2 or higher ⁴	\$400	per system
HVAC System	Central Air Conditioner – 15 to 16.99 SEER2 ⁴	\$250	per system
HVAC System	Tune-up for Existing Heat Pump or Central Air Conditioning System ⁶	\$50	per system
Water Heating	Heat Pump Water Heater	\$800	per unit
Duct System	Duct Sealing, Repair, Insulation or Replacement ³	\$300	per system
Air Sealing	Envelope Air Sealing	\$300	per home
Insulation	Attic Insulation	\$500	per home
Insulation	Wall Insulation	\$300	per home
Insulation	Floor Insulation	\$100	per home
Windows	Window Replacement ²	\$15	per window

¹ Must be installed by an approved QCN member and meet TVA Standards effective on installation date. All measures, except Window Replacement eligible for program Financing.

² Must replace existing unit(s).

³ Must be for existing or replacement HVAC system.

⁴ Must replace existing primary electric heat source or be installed in a newly finished area of the home (e.g., bonus room, addition, sunroom).

⁵ Defined as a minimum 15.2 SEER2 and 8.1 HSPF2 or higher all-electric heat pump, with a variable speed compressor, excluding two-stage compressors. System produces 100% of rated heating capacity without backup heat at 17 degrees F, cooling capacity cannot exceed 125% of cooling load at design conditions and is installed by a manufacturer certified installer. QCN must provide Manual J 8th edition with project submission and upload in the Residential Hub.

⁶ One HVAC tune-up per system per year, electric system only.
